

PRODUCT OVERVIEW

Applications:

Auto dealerships
Schools
Churches
Industrial sites

Shopping centers
Parking lots
Substations
Building facades

TENON SLIPFITTER

Weight: 18.5 lbs
EPA: 1.32 sqft

TRUNNION

Weight: 17.35 lbs
EPA: 1.22 sqft

YOKE (DOWN)

Weight 19.35 lbs
EPA: 1.22 sqft

YOKE (UP)

Weight: 19.35 lbs
EPA: 1.22 sqft

Features:

Mechanical

Low copper content die-cast aluminum housing and electrical cover with bolts or optional stainless steel latches disengage for easy access to LED driver, surge protection, and terminal block.

Four mounting options including trunnion, yoke and two variants on tenon slip-fitter. Tenon may be ordered with leads exiting the bottom or side of knuckle joint and is adjustable to fit 2-3/8 inch to 2-7/8 inch tenon.

All mounting variants can optionally be ordered either corded or individually jacketed wires.

Luminaire is vibration rated to 3G per ANSI C136.31-2018 and rated IP66 per IEC60068-2-3.

Rigorous five-stage pre-treating and painting process yields a finish that achieves a scribe creepage rating of 8 (per ASTM D1654) after over 5,000 hours exposure to salt fog chamber per ASTM B117. The yoke is provided in either painted or galvanized steel.

Electrical

LED light engine is rated minimum 100,000 hours at 25C, L70.

Electronic driver has an expected life of 100,000 hours at a 25C ambient. Driver meets maximum total harmonic distortion (THD) of 20% and is ROHS compliant.

MOV pack surge protection meets ANSI 10kV/5kA "Enhanced Level".

Luminaire available with either a 0-10v dimmable driver or DALI D4i driver. Luminaire is continuous and step dimming capable via AO option or other installed controls.

XVOLT tank driver option for protection against dropped neutrals and other power quality issues.

Optical

PCB mounted LED technology comprised of multi-cluster LEDs on single metal core board.

Segmented Miro internal reflectors are designed for superior field to beam ratios, uniformity, and spacing. NEMA optical pattern choice of flood (5x5) and wide flood (6x6).

The luminaire is available with 3000K, 4000K, and 5000K CCT with minimum CRI of 70.

Optical enclosure is flat glass lens.

Optional shielding available to control light trespass and uplight.

Controls

The Acuity designed ANSI 7-pin receptacle is available, which supports traditional locking style photocontrols such as the Extreme long-life solid-state locking style photocontrol - PCLL (20 year rated life).

Optional onboard Adjustable Output module allows the light output and input wattage to be modified to meet site specific requirements, and also can allow a single fixture to be flexibly applied in many different applications.

The DC Connect option is a factory embedded low voltage dusk to dawn photocontrol that increases longevity vs. line voltage controls and also eliminates the need to separately inventory controls.

The Local Connect option provides a simple means to collect luminaire attribute data, asset location information and execute point-to-point on/off/dim commands via secure Bluetooth link using smartphone platforms.

Cell Connect is an embedded network photocontrol with cellular communication. It provides digital switching, precise dimming, and revenue grade metrology. Cell Connect leverage D4i drivers to communicate real-time data to UbiVu, a cloud-based asset management system.

Additionally, it can be equipped with sensor-ready technology to support Zhaga standard sensors enabling smart city solutions utilizing long range network nodes to enable remote monitoring and control.

Standards

Suitable for ambient temperatures from -40C to 40C.

CSA Certified to U.S. and Canadian standards.

DesignLights Consortium® (DLC) qualified product. Not all versions of this product may be DLC qualified. Please check the DLC Qualified Products List at www.designlights.org/QPL to confirm which versions are qualified.
